Employee Attrition Strategy Report

Consulting Style Business Review

Prepared By: Mohd Badruzama Ansari

Data Analytics Portfolio Project • 2026

Executive Summary

The organization faces a 16.12% attrition rate. Analysis identified four major drivers: overtime burden, compensation gaps, poor work-life balance, and retention challenges among younger employees.

Total Employees	Employees Left	Attrition Rate	Avg Income
1,470	237	16.12%	\$6,503

Key Findings

Department Risk

Sales records 20.63% attrition and is the highest-risk department.

Age Risk

Employees aged 18–25 show 34.78% attrition.

Role Risk

Sales Representatives show 39.76% attrition.

Compensation

Employees leaving earn ~\$2,046 less per month.

Workload

Overtime workers leave at nearly 3× the rate of others.

Risk Assessment Matrix

Risk Factor	Severity	Business Impact
Overtime	Critical	Productivity & Retention
Young Workforce Attrition	Critical	Future Talent Pipeline
Low Compensation	High	Employee Retention
Work-Life Balance	High	Engagement & Morale
Sales Department Attrition	High	Revenue Performance

Strategic Recommendations

Priority	Recommendation	Expected Outcome
1	Reduce Overtime Dependency	Lower Attrition
2	Review Sales Compensation	Improve Retention
3	Launch Early-Career Programs	Retain Young Talent
4	Annual Salary Benchmarking	Reduce Pay Gap
5	Flexible Work Initiatives	Improve Work-Life Balance

Projected Business Impact

Reducing attrition by 5 percentage points could save substantial recruitment, onboarding, and productivity costs while improving workforce stability and organizational performance.

Portfolio Skills Demonstrated

- Data Cleaning & Preparation
- SQL Analysis
- Business Intelligence
- Dashboard Development (Tableau)
- KPI Design
- Executive Reporting

Conclusion

Attrition is a strategic business challenge rather than an isolated HR issue. Targeted interventions in compensation, overtime management, and employee development can significantly improve retention and long-term business outcomes.
